Project Overview

Provide a brief description of what your web app does and its purpose.

Features

- **Login Page:**

    Description: Describe the login page and mention any special design elements used.

- **Onebox Screen (/google-login)**

    Description: Explain what this screen displays or its purpose.

    API Integration: Describe how data is fetched using the APIs provided (`/onebox/list`, `GET /onebox/:thread_id`, `DELETE /onebox/:thread_id`).

- **Keyboard Shortcuts**

    Description: List the implemented shortcuts ("D" for delete, "R" for reply) and their functions.

- **Custom Text Editor**

    Description: Explain the custom text editor and mention any additional buttons added ("SAVE", "Variables").

- **Reply Functionality**

    Description: Explain how the reply feature works and how the send functionality (`POST /reply/:thread_id`) is implemented.

- **Light and Dark Mode**

    Description: Describe how users can switch between light and dark modes.

Example Structure (Markdown Format)
